01 - Search and reservation

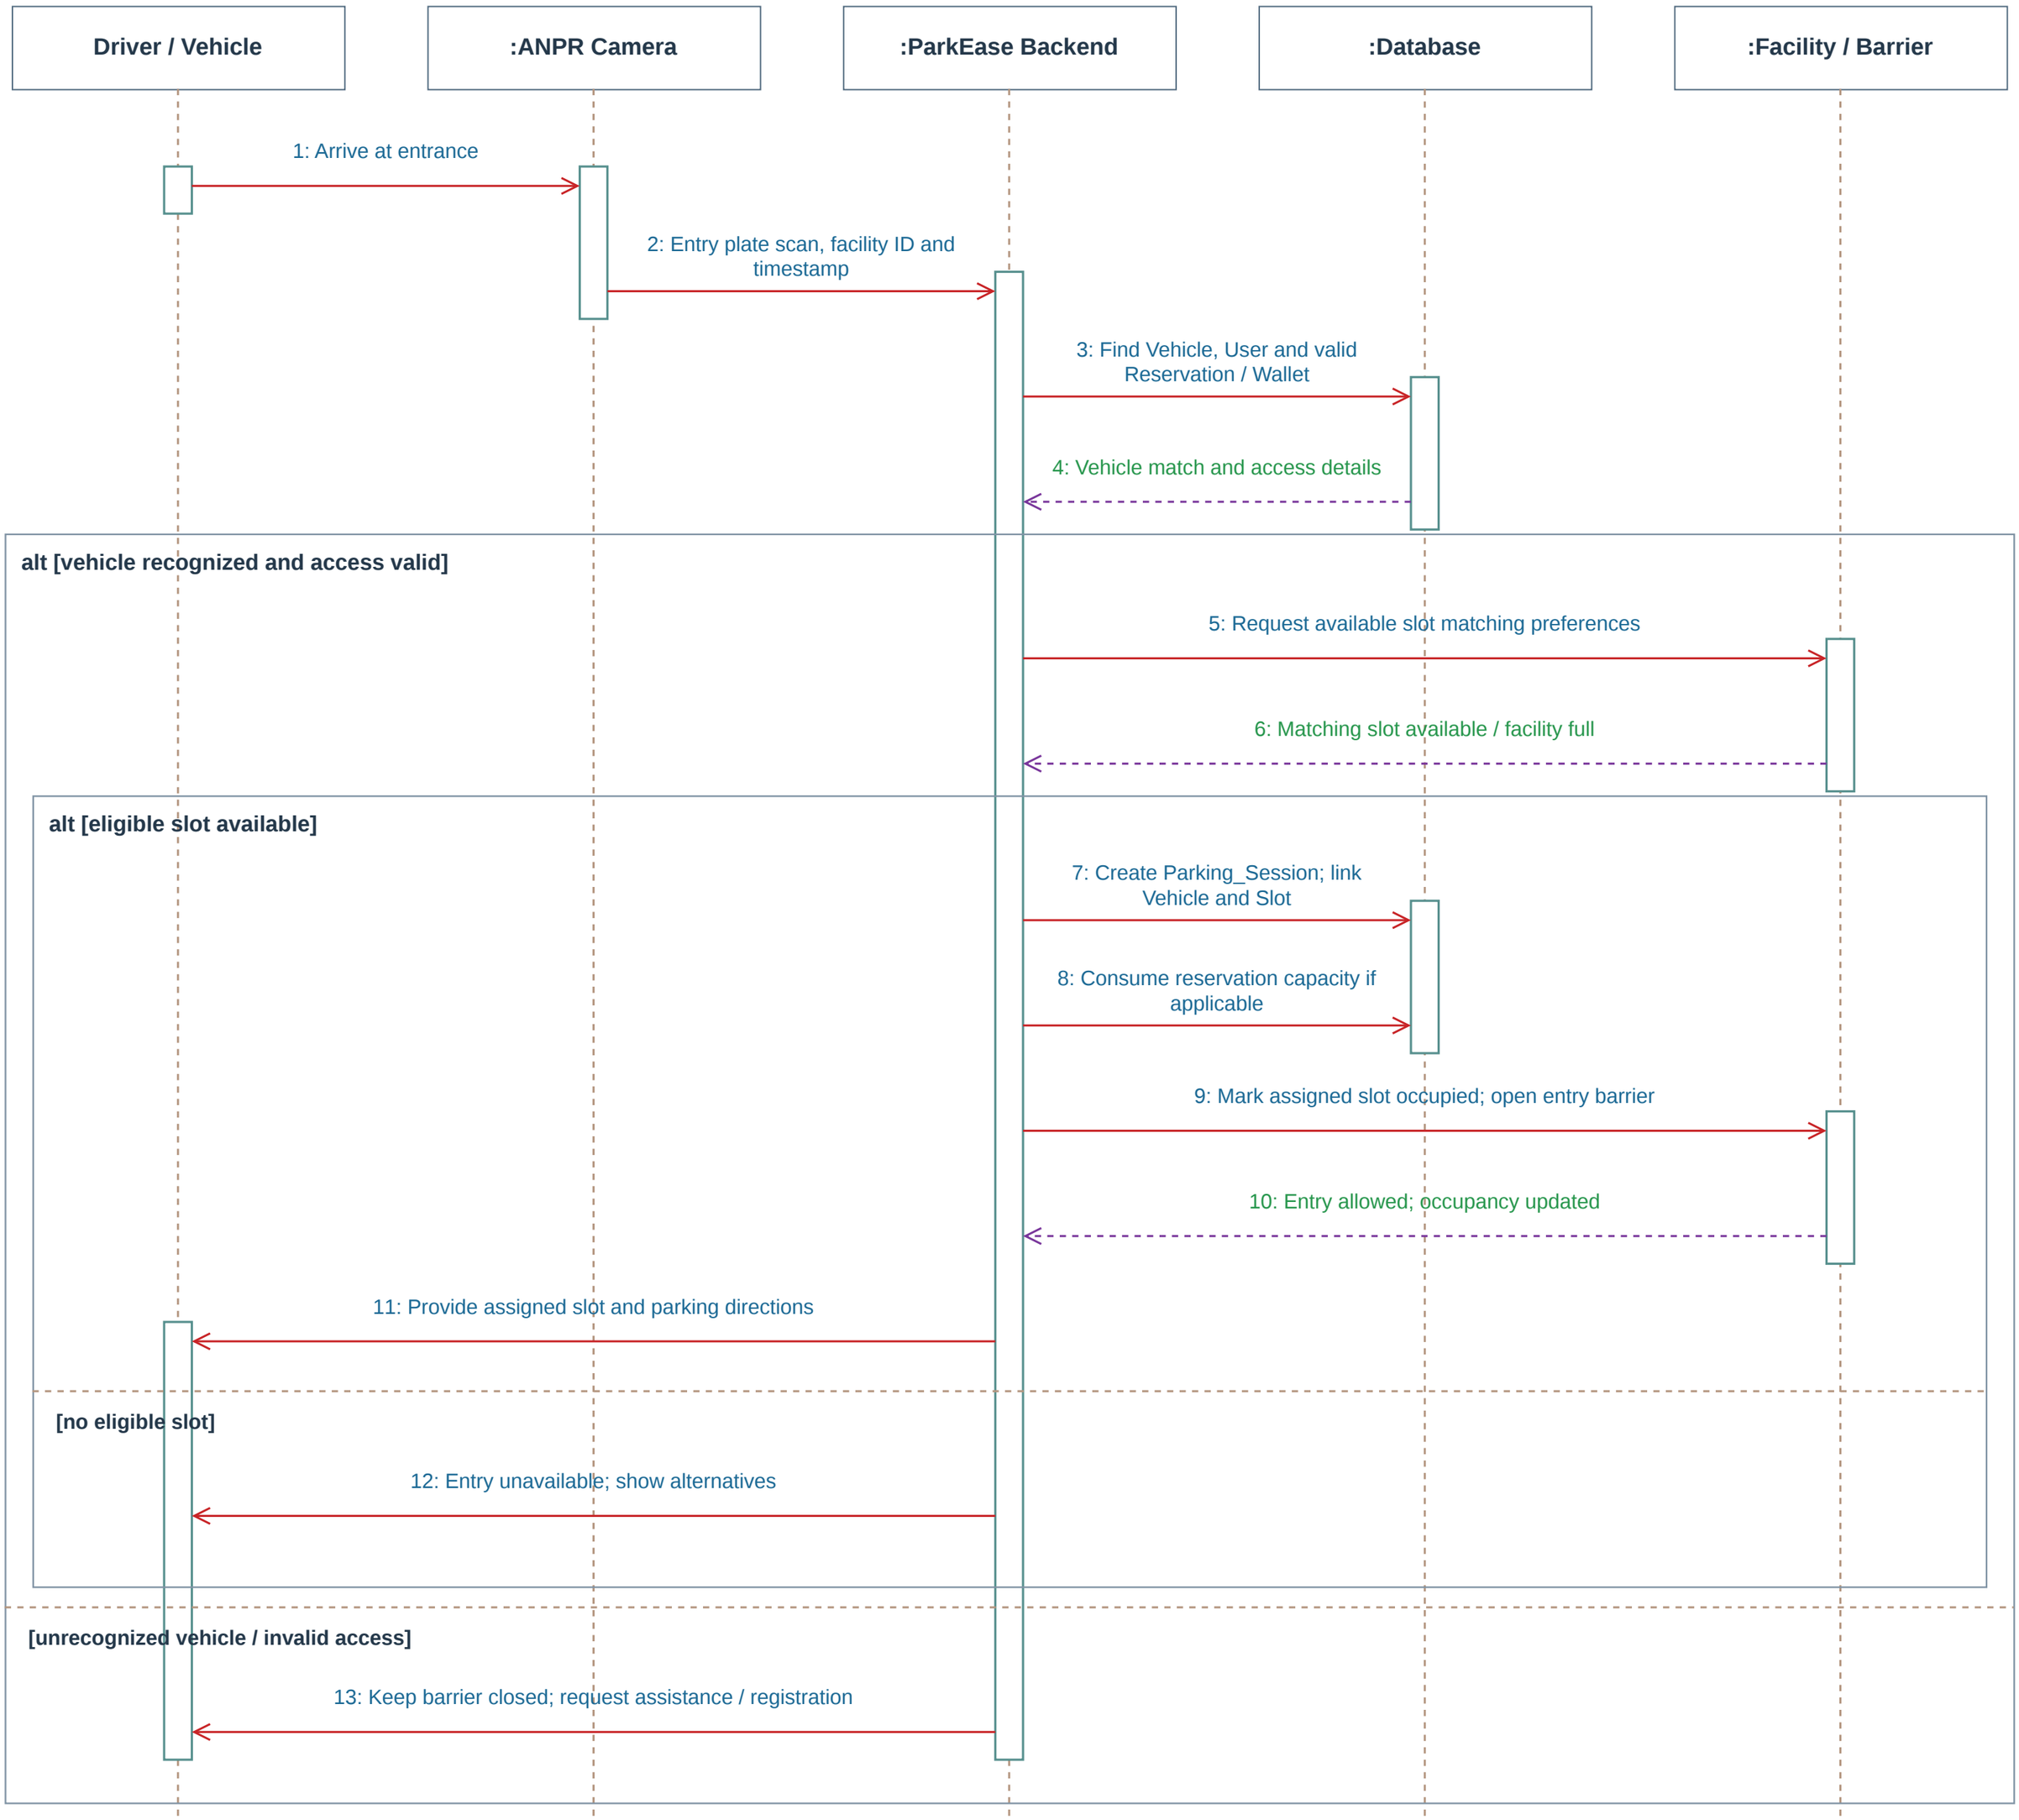

Visitor booking flow. A reservation holds facility capacity; the physical slot is assigned on arrival.

ref 02 - Automatic entry: continue with the reservation, or use the linked-vehicle / wallet flow without a reservation.

Red arrows / blue labels: requests | Purple dashed arrows / green labels: returns | Narrow bars: activations | opt: optional | alt: alternatives | ref: linked interaction

02 - Automatic entry

ANPR verification precedes dynamic slot assignment. Entry uses live facility availability.

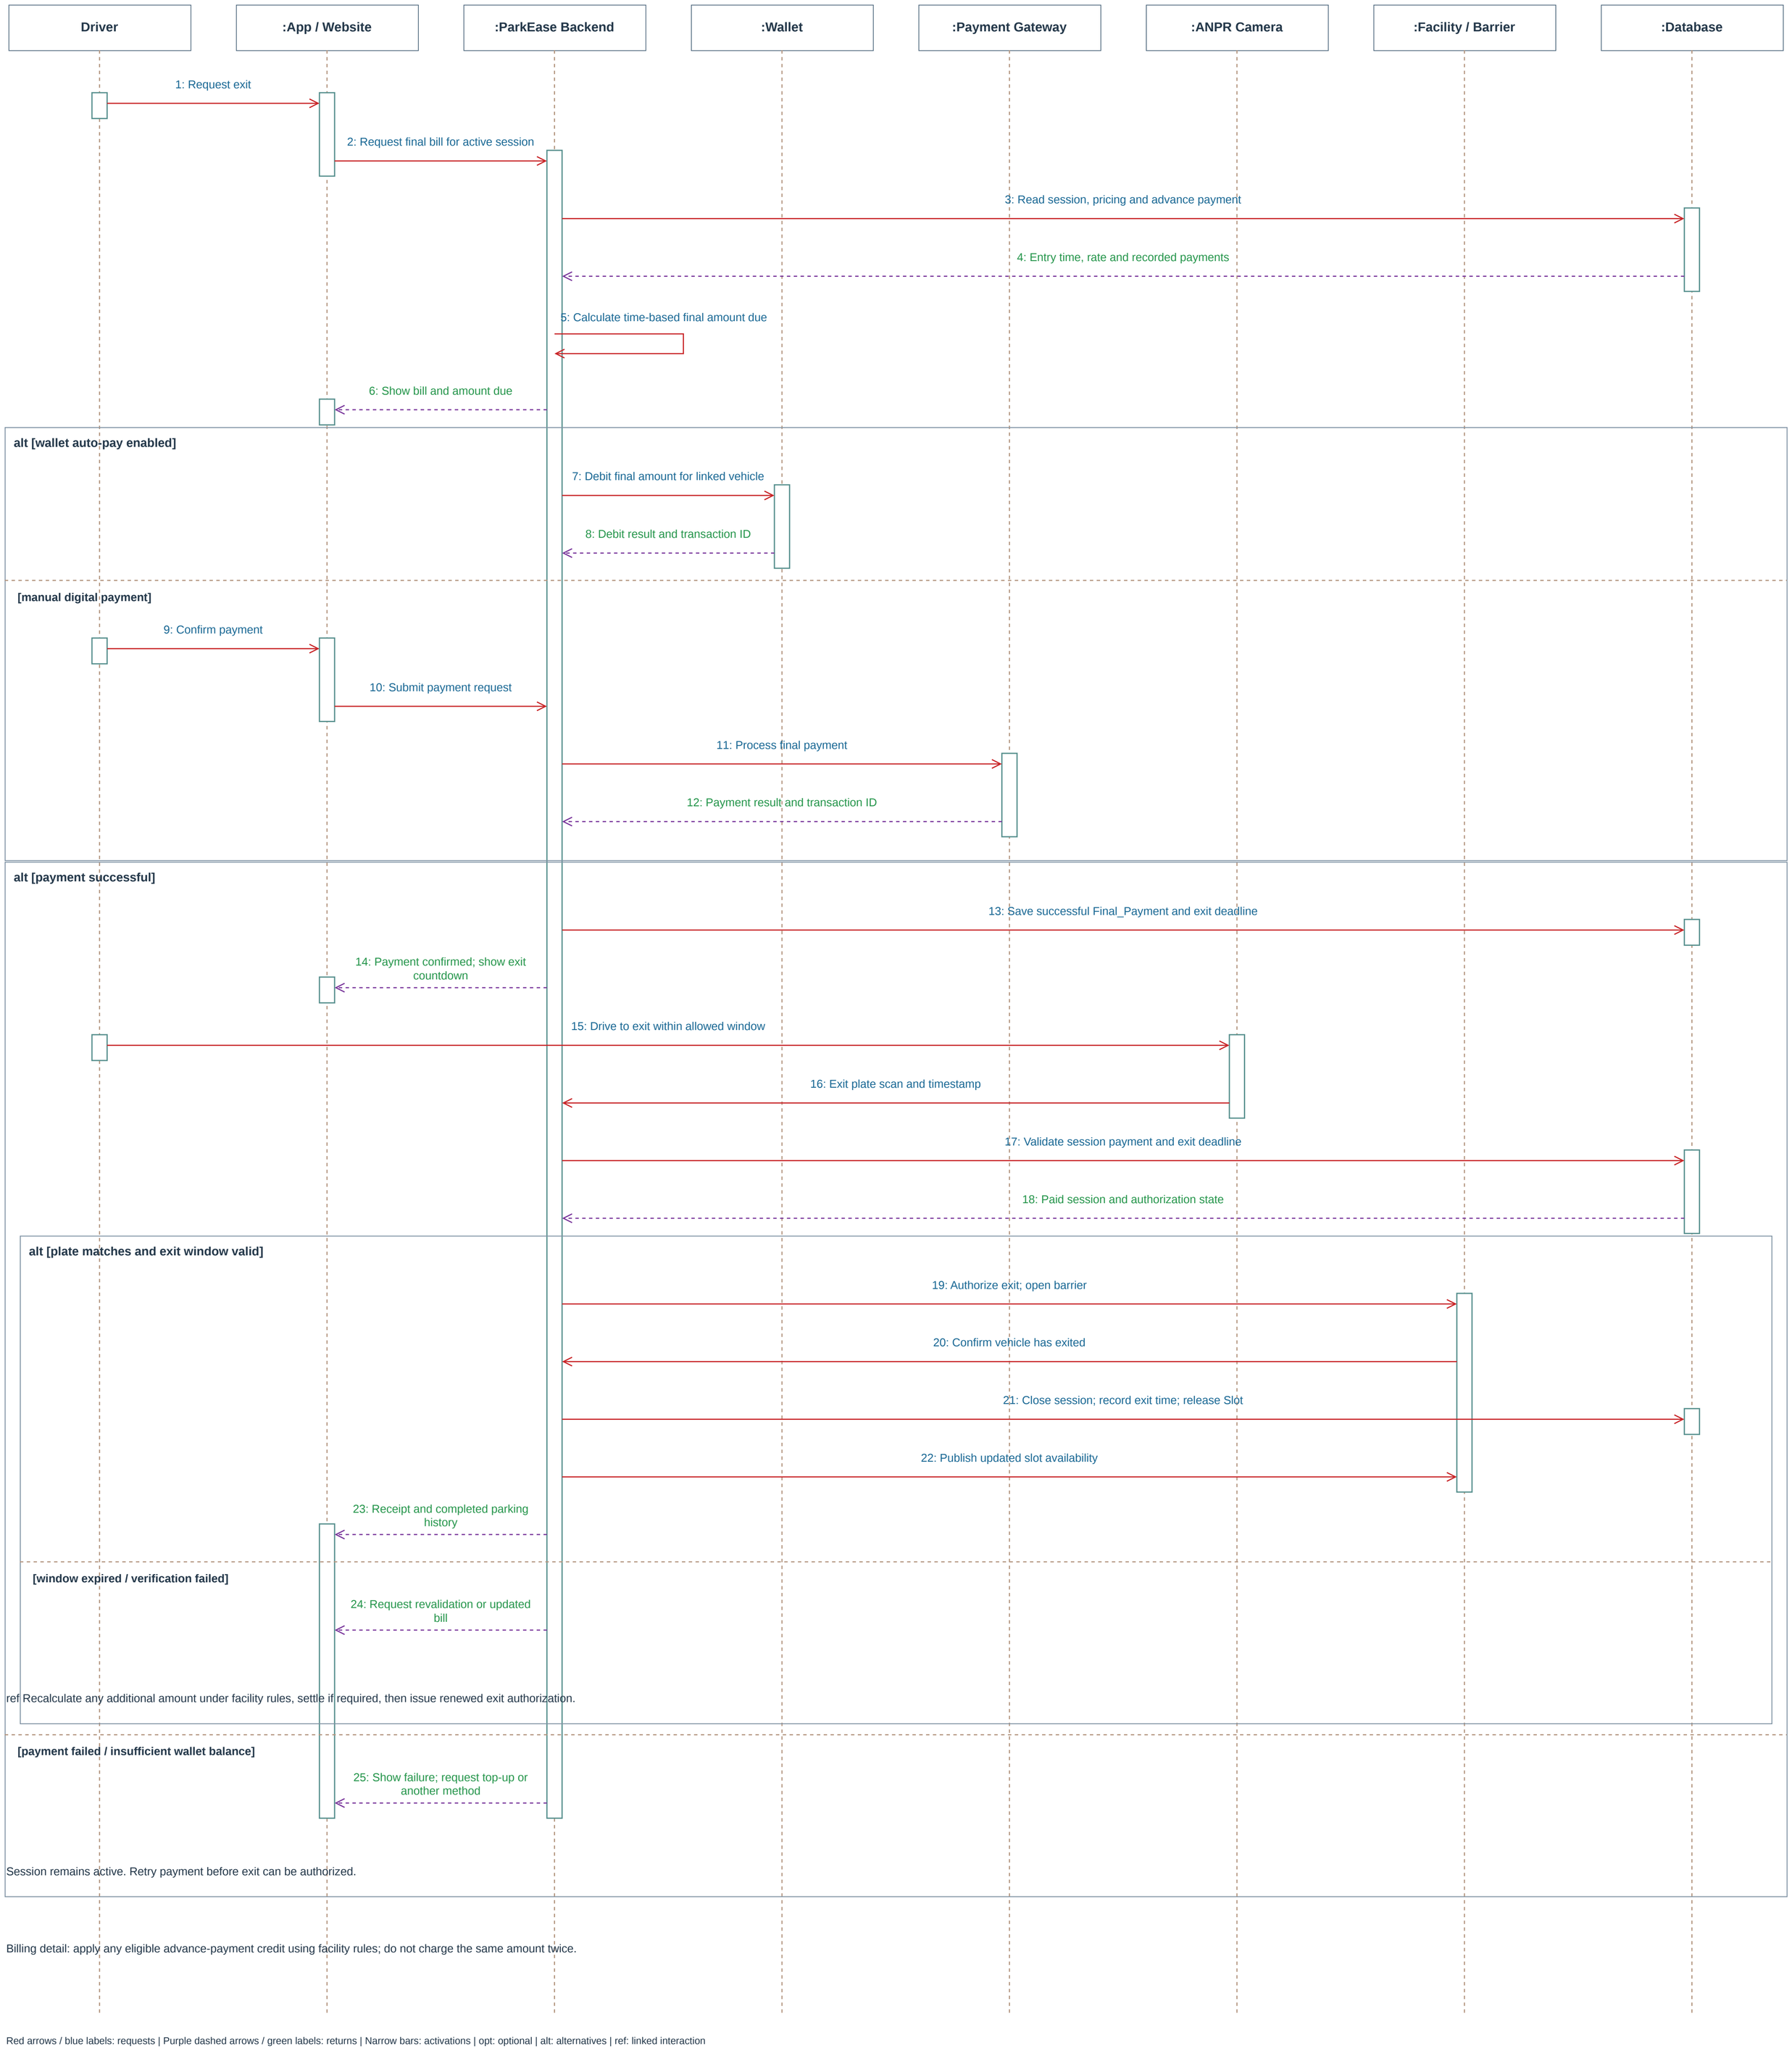

ref 03 - Billing and exit: the active session records entry time and the slot assigned at arrival.

Red arrows / blue labels: requests | Purple dashed arrows / green labels: returns | Narrow bars: activations | opt: optional | alt: alternatives | ref: linked interaction

03 - Billing and exit

Exit payment grants a 10-minute authorization plus configurable grace. Release the slot only after confirmed exit.

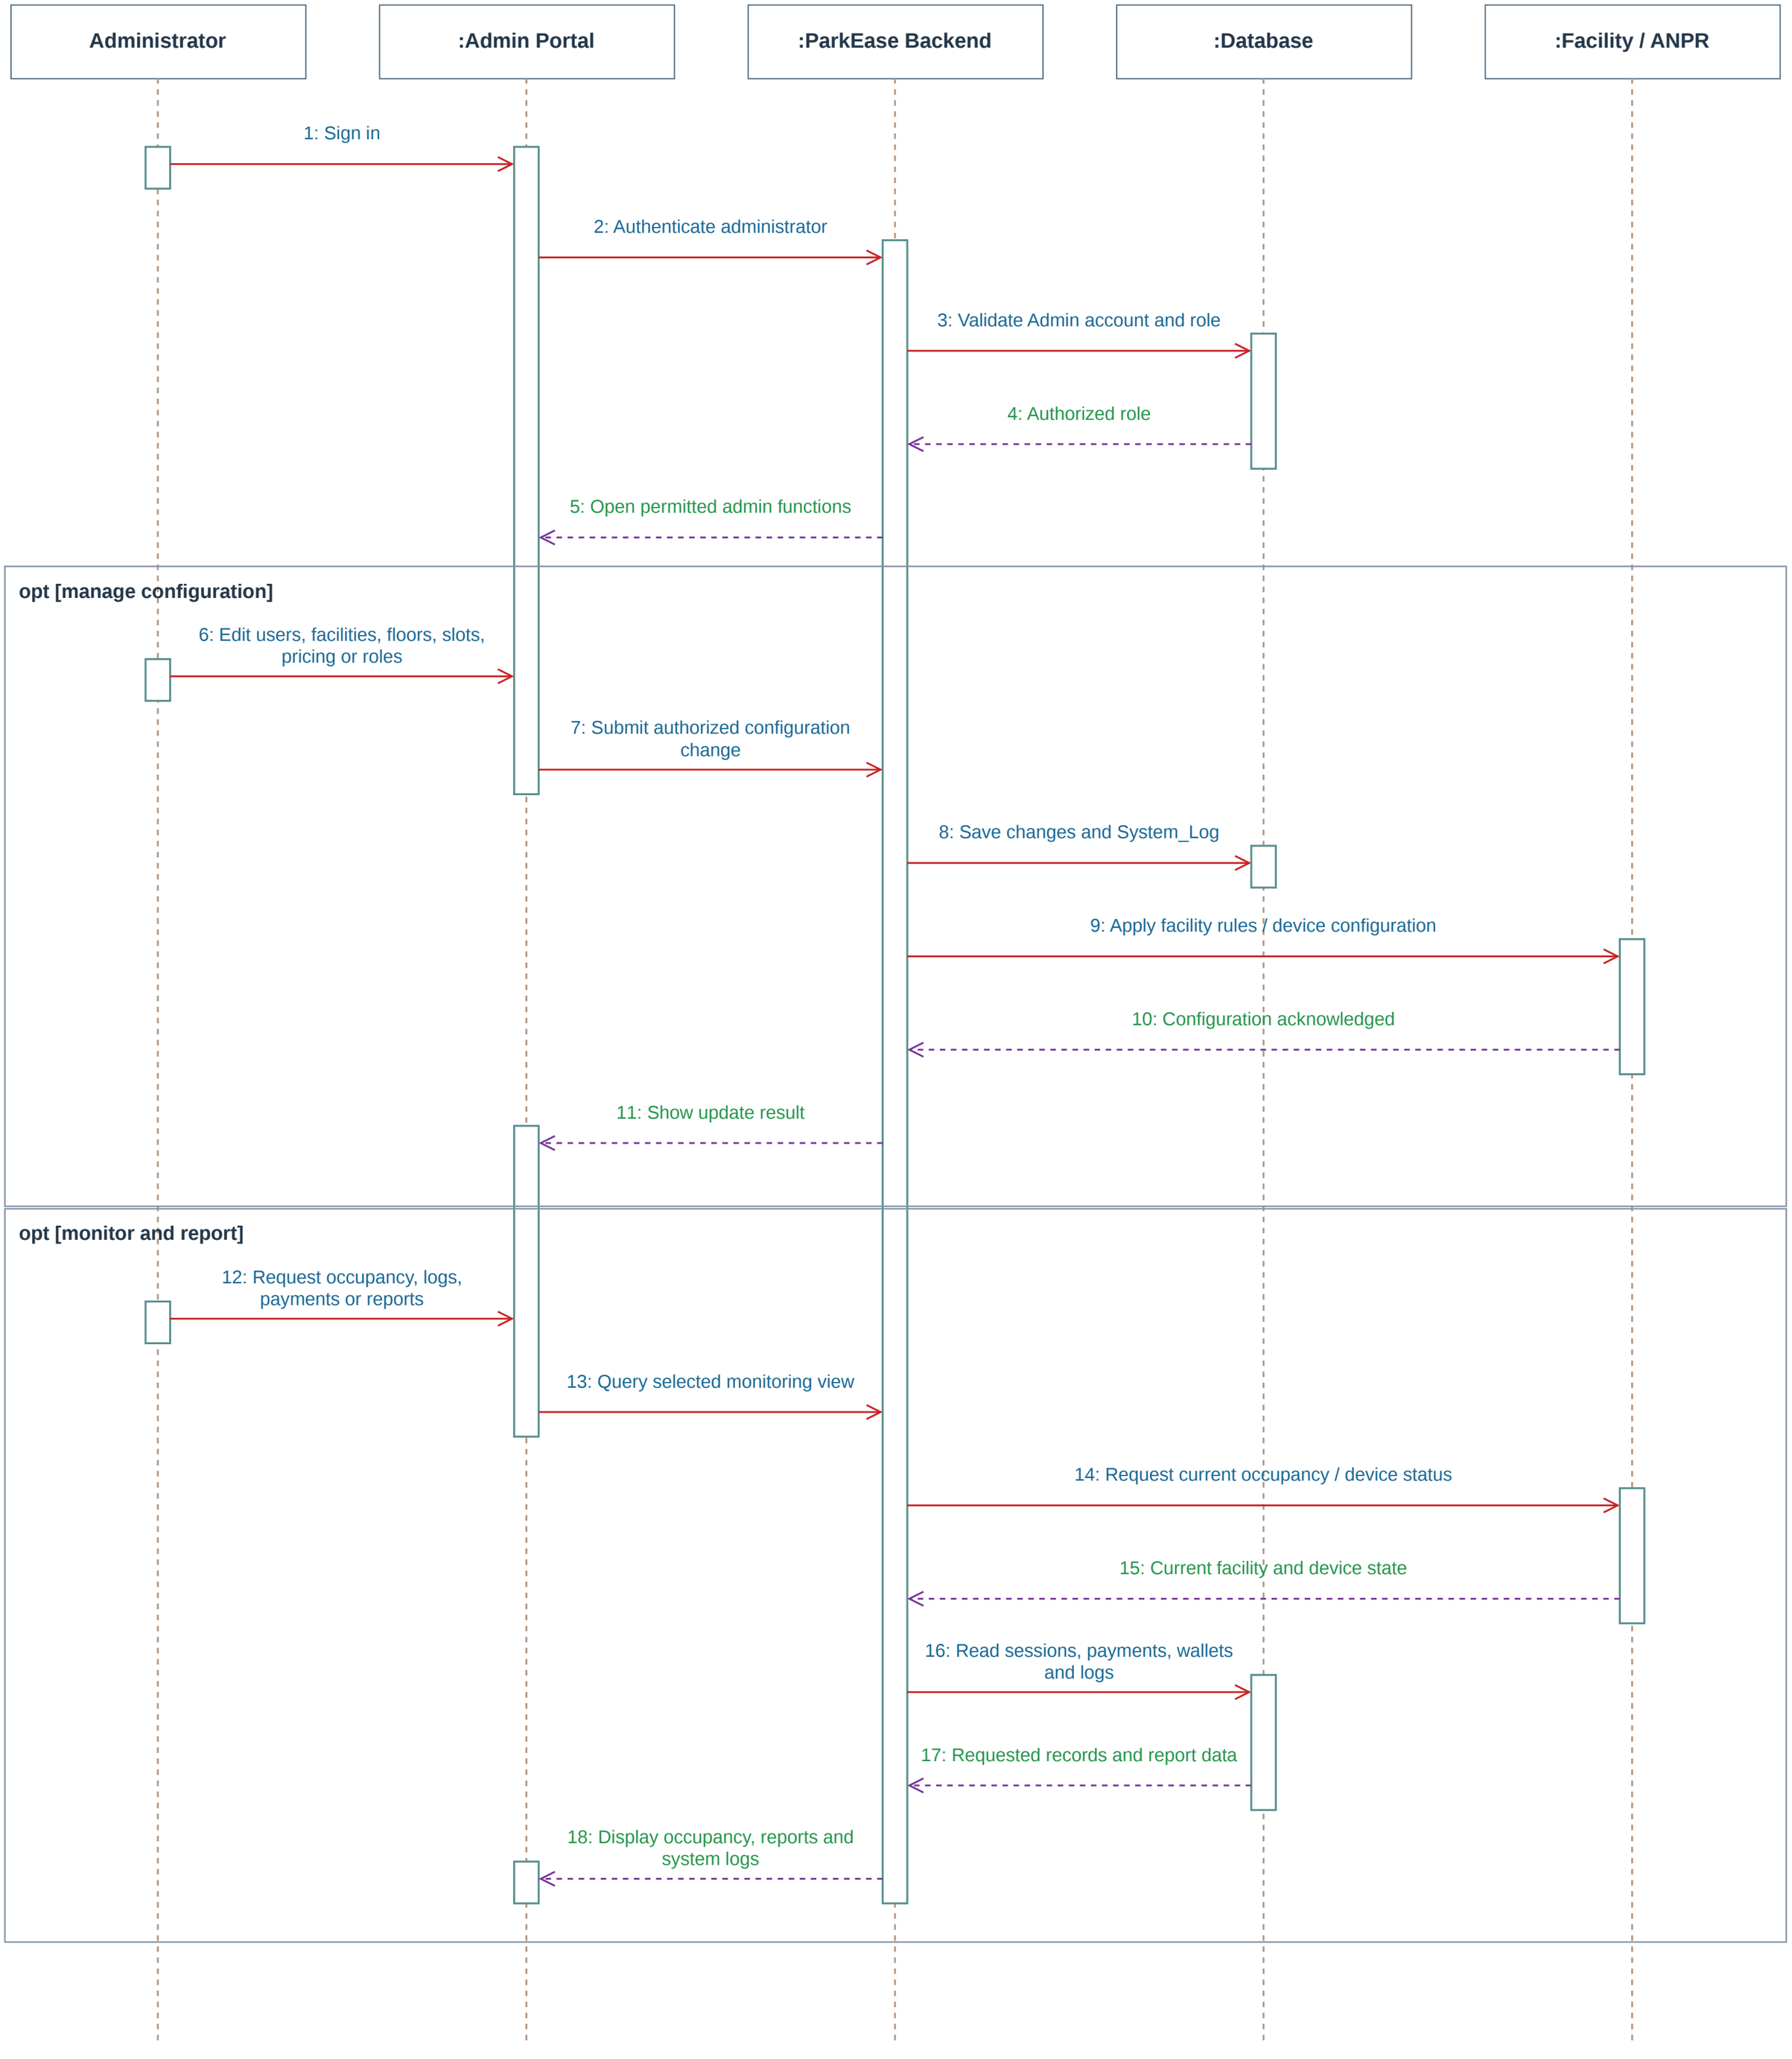

Billing detail: apply any eligible advance-payment credit using facility rules; do not charge the same amount twice.

Red arrows / blue labels: requests | Purple dashed arrows / green labels: returns | Narrow bars: activations | opt: optional | alt: alternatives | ref: linked interaction

04 - Admin management

Independent management interactions. These do not run as part of each driver parking session.

Red arrows / blue labels: requests | Purple dashed arrows / green labels: returns | Narrow bars: activations | opt: optional | alt: alternatives | ref: linked interaction
